

Julian Wilkins-Manifesto

I would welcome the opportunity to contribute to the excellent work of the London Branch in supporting, informing and educating members, as well as nurture the existing sense of community.

Also, it is a chance for me to work more closely with the Chartered Institute of Arbitration to help build my own understanding and insight in relation to arbitration whilst at the same time contributing to the aims of the London Branch.

I consider my broad legal experience and working across different industry sectors will enhance the already excellent work of the London Branch as it promotes arbitration including new challenges and opportunities for arbitral work.

My contribution would be to help organise events that give insight into how disputes arising from technologies, such as the omnipresence of Artificial Intelligence (AI), can be resolved by arbitration.

As an experienced mediator, I would also encourage the interplay between arbitration and other forms of dispute resolution.

I have considerable experience as a legal practitioner but as a relative newcomer to the world of arbitration I would like to support through the London Branch the interests of newer members, especially in respect of opportunities to build their experience in arbitration.

Also, use my lecturing and speaking experience for the benefit of members whether organising, Moderating or speaking at an event.

Areas of particular interest for me include the role of arbitration regarding artificial intelligence, blockchain and other Distributed Ledger Technologies and how they apply in different sector, by example renewable energy, and data protection. Sector areas that I would be interested in exploring the role of arbitration include the creative industries and the automotive and MAAS (Mobility as a Service) sectors.

In any event, I would welcome generally working with and supporting the work of the London Branch committee for the interest of its members.

I shall be very grateful for your support in electing me to the London Branch Committee.

Best wishes,

Julian

Julian Wilkins
